Mobile Solutions

Today, mobile and handheld devices optimize people's life and business. HiQo Solutions offers top notch software development services for Mobile and Handheld platforms. We specialize in iPhone/iPad, Android, Windows Mobile, Symbian OS, Palm OS, as well as delivery cross-platform libraries for mobile applications.

From the first day on HiQo Solutions software engineers have provided the best of breed technology solutions to satisfy the needs of clients in Mobile and Handhelds development areas such as system applications, instant messaging, image recognition, calculations, application porting, proprietary libraries and database engines, etc. HiQo Solutions programmers' extensive knowledge in Mobile and Handhelds application development allows them to accomplish software development tasks of any complexity. Whatever the customer's project requirements may be, the HiQo development center is able to take care of the entire product development life cycle, including requirements gathering and analysis, technology research, proof-of-concept prototyping, technical design, programmatic implementation, testing and maintenance.

The best reference is your own organization. Give us a try! We will work on a test project for up to two weeks, and if you don't like the result, it is on us. You won't owe us a dime - This is the HiQo risk free trial model.
